

## Vite and tailwind CSS for React and JavaScript

Edit the "vite.config.js" file:

```
import { defineConfig } from "vite";
import react from "@vitejs/plugin-react";
import tailwindcss from "tailwindcss";

// https://vite.dev/config/
export default defineConfig({
  plugins: [react()],
  css: {
    postcss: {
      plugins: [tailwindcss()],
    },
  },
});
```
